Internet Connect

From simple business internet to uncontended, dedicated global internet access, we provide solutions to meet your needs and those of your customers.

BT Internet Connect Ireland is a scalable, affordable, dedicated internet access solution for SMEs, internet service providers, and large enterprises that need guaranteed bandwidth that keeps pace with their business.

With upload and download speeds of up to 10Gbps, you can offer as much as your customers need, with no caps or restrictions.

We also provide industry-leading latency, so your customers can enjoy the productivity boost of easy file transfer, smooth web browsing and efficient communication.

BT Internet Connect Ireland combines the high performance and reliability of the existing BT Ethernet Connect Ireland service with the power and reliability of AS 2100, BT's internet core in Ireland.

Why choose BT Ireland?

Superior support

Our Dublin network management centre provides 24x7x365 support, with a focus on proactive interventions to resolve incidents before they impact you.

Irish reach

We provide national coverage with direct access to our high-capacity global internet backbone AS 5400 in 31 countries. That's in addition to direct, on-net service across 350+ cities in Europe, the US, Asia, the Pacific, and Latin America.

Secure and compliant

We're an award-winning global leader in security, with security professionals in 180 countries protecting your data against millions of cyberattacks. What's more, we can seamlessly integrate managed distributed denial of service (DDOS) protection into your service.

Features and benefits of Internet Connect

Low network hop-counts

By minimising 'network hops' and potential points of failure, we remove the complexity of transiting internet traffic from Ireland to the world. Using our global upstream AS5400 network, we can connect to key locations globally.

High quality peering

We have local expertise in peering, with INEX facilitating inter carrier, high-performance, low-cost connections, saving you transit and subscription costs.
High performance

We provide consistent, high-speed internet connectivity with reduced latency for local traffic. This is backed by stringent service level agreements and multiple access speeds from 2mbps up to 10G.

Resilience

We offer a resilient and diverse service, giving your customers peace of mind.

To find out more, contact us by phone: 1800 924 929 or through our online customer enquiry form.

Technical checklist

High speeds: up to 10Gbps.

IP Address: both IPv4 and IPv6 address support.

Routing: static and dynamic (BGP) routing options.

Resilience options including failover and load balance.
