

Wholesale Broadband Internet

A fully managed business broadband solution offering low costs, high speeds and network reliability.

A managed variant of our wholesale white label service, wholesale broadband internet features service desk ordering, turn-key delivery, a static public IPv4 address presented over Ethernet GE and is offered across NGA platforms (FTTC and FTTP), with speeds from 40Mb to 1Gb.

We install and manage a working service backed up with comprehensive Service Level Agreements; providing fix maintenance, base configuration, and connectivity testing .

Why choose BT Ireland?

Superior support

Ensuring that you and your customers get the highest standard of customer service is important to us. That's why we have a dedicated team of broadband specialists on our wholesale service desk who can support you each step of the way.

Largest addressable market

To make sure no customer is left behind, we offer the largest addressable market for FTTx in Ireland.

Industry influence

We use our industry influence to drive positive change for our customers. Our team of wholesale and regulatory specialists play a key role in shaping the communications industry.

Features and benefits of Wholesale Broadband Internet

Dedicated presales and ordering process

When you opt for our wholesale broadband internet, our agents manage customer orders and tickets, significantly reducing your resourcing requirements.

Dedicated wholesale service desk

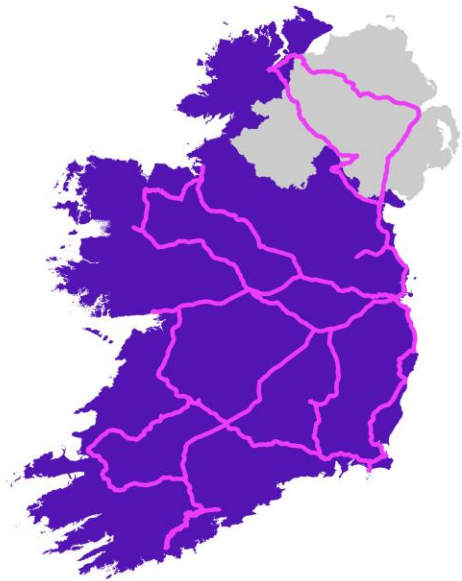

Our personalised, highly skilled service desk provides tailored support when you need it. Using expert knowledge and resilient internal processes, we ensure minimal disruption for you and your customers by resolving issues quickly via a single point of contact.

Reliable network

We're a trusted service provider, and our locally managed network facility makes sure that we react quickly to any issues – providing you with peace of mind and your customers with an exceptional experience.

Competitive pricing and low market entry

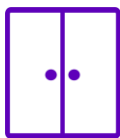

Using our wholesale broadband internet, you'll have fast, low-cost entry to market without needing to invest in your own network.
